

# MANN-FILTER

## Product Information

No 127  
20/01/2017

### Replacement of C 27 029 with C 27 030

#### Why is MANN-FILTER air filter C 27 029 being replaced with C 27 030?

MANN-FILTER is now offering air filter C 27 030 for C 27 029 applications. The new air filter differs visually from the C 27 029, but also meets the original equipment quality standards guaranteed for a MANN-FILTER spare part in terms of separation efficiency, dust capacity and pressure loss - which means it also meets the stringent requirements of the international automotive industry.

#### What is different about MANN-FILTER air filter C 27 030?

The only difference between MANN-FILTER C 27 030 and C 27 029 is their visual appearance. The function, application and quality are all the same.

Existing part C 27 029

Replacement type C 27 030

#### What does this mean for the customer?

This change will not affect the customer's applications – the filter can be installed in the housing as usual.
