14.09.2020

MANN-FILTER replaces C 41 001 KIT by C 40 006

The C 40 006 replaces the C 41 001 KIT in the air filter program of MANN-FILTER. The difference between the old and the news version is, that the C 40 006 is a one piece solution with a firmly connected element and housing cover:

Replaced: C 41 001 KIT with detachable housing cover

New version: C 40 006 with firmly connected cover

The new version is, dimensionally and in terms of performance, identical with its predecessor. Therefore the C 40 006 provides the familiar original equipment quality of an air filter from MANN-FILTER.
