Guide sleeve with pre-installed O-ring and shaft seal

The contents of this LuK GearBOX have been optimised. A guide sleeve with the pre-installed O-ring and shaft seal replaces the separate components. During the transition phase, the two seals and the pre-assembled guide sleeve will be included in the LuK GearBOX.

There is a choice of two repairs:

1. Remove the shaft seal and O-ring from the old guide sleeve and replace them with the two new seals.
2. Install the guide sleeve with the pre-installed seals.

Please observe the vehicle manufacturer specifications!
