Concentric slave cylinder 510 0180 10

Warning

Effective immediately, all individual packages of LuK concentric slave cylinder 510 0180 10 will include a warning label (Fig. 1). It explicitly states that the concentric slave cylinder must not be used in combination with the clutches of other manufacturers.

Reports from the field indicate that use of the concentric slave cylinder (Fig. 2) in combination with certain clutches from other manufacturers can result in leakage and therefore premature failure of the clutch release system.

The reason for this lies in the design of certain clutches of other manufacturers, whereby specific characteristics may deviate too far from Schaeffler standards. This can subject the concentric slave cylinder to excessive loading as a result, which can in turn roughen the guide sleeve. This then causes the seal to wear prematurely and therefore leak.

So in order to prevent this type of damage, the concentric slave cylinder listed above must be installed only with LuK clutches or as a complete solution (RepSet Pro) with LuK-approved clutches.

⚠ WARNING			
	No LuK + LuK CSC		
	LuK Clutch + LuK CSC
