Cylinder head cover gaskets do not fit all models

The cylinder head cover gasket contained in the set does not fit all cylinder head covers used for this engine. An older version of the cylinder head cover exists for which there is no replacement gasket.

It can be recognized by the two interior positioning guides (see Fig. 2b). In these cases, a complete cylinder head cover including gasket must be purchased from Volkswagen/Audi.

These can be recognized by the interior positioning guides (see Fig. 2a) and can then be sealed with the gasket supplied by us (REINZ No. 71-35884-00).

VICTOR REINZ – the easiest way to get a good gasket.
