LEADING FROM THE REAR

***OUR HD REAR AXLE CONTROL ARM FOR THE
VOLKSWAGEN GROUP MQB PLATFORM***

RELIABLE. ROBUST. SAFE

MEYLE no.: 116 050 0236/HD

The new zinc flake coating of our rear axle control arm ensures a longer service life – and corrosion hardly has a chance. Less wear and tear, greater safety and material resistance. Environmental influences such as stone impacts and gritting salt are outmanoeuvred. No question about it: our products at the back of the MQB platform are way out in front.
