

SWAG 60 92 2265

SWAG®

To Fit:

Nissan, Opel, Renault and Vauxhall various models.

Ball Joint with additional parts

When the original ball joint requires to be replaced, due to wear or damage, SWAG offers a repair kit 60 92 2265, which includes the ball joint and fixing kit (incl. 3 collar bolts and self-locking nuts).

The original ball joint is secured to the lower suspension arm with rivets. These require to be carefully removed with a drill before fitting the new joint. This repair can be completed without removing and replacing the suspension arms, saving time for an efficient repair.
