

# SWAG 30 93 7400 30 93 7401, 30 93 7402

Repl. No. G 012 A8G

## The alternative to OE! Antifreeze (purple)

SWAG no. 30 93 7400 (1,5 litres)

SWAG no. 30 93 7401 (5 litres)

SWAG no. 30 93 7402 (60 litres)

SWAG 30 93 7400 is a state-of-the-art premium long-term antifreeze concentrate based on monoethylene glycol with cutting-edge OAT (Organic Additive Technology).

Because of its outstanding properties, SWAG 30 93 7400 exceeds the requirements of a large number of manufacturers and foreign standards.

### SWAG antifreeze:

- can be used for all vehicles, both trucks and passenger cars
- corresponds to the new VW standard antifreeze G12 plus plus
- meets the requirements of MAN 324 type Si-OAT, Scania TB 1451 and MB 325.5 (000 989 28 25)
- is downwardly compatible and mixable with all other branded antifreeze agents available on the market
- offers outstanding corrosion protection and is particularly suitable for aluminium, silicon and magnesium alloys
- raises the boiling point of the radiator fluid
- has excellent thermal conductivity
- provides a high level of protection against limescale, acid and cavitation
- is highly compatible with gaskets and seals
- provides protection against freezing down to -36°C (with a recommended mixing ratio of 1:1 with water)
- promotes the longevity of moving parts such as water pumps, thermostats or heating valves

Other fluids in the SWAG range can be found in the SWAG 8 00 1040 fluids flyer!
