

SERVICE INFO

Classification of FAG Repair Insert Unit (RIU) 566074.H195 and 566834.H195

Manufacturer:	DAF
Models:	65CF, 75CF, 85CF, CF65, CF65II, CF65IV, CF75, CF75II, CF75IV, CF85, CF85II, CF85IV, LF55, LF55IV, XF95, XF95II, XF105,
Part Nos.:	566074.H195 566834.H195
OE Nos.:	1691621, 1699327 1388905, 1391615

The two FAG service compact bearings (RIU) listed above can be used to repair various DAF wheel hubs.

In doing so, a complete replacement of the wheel hub can be avoided. It is therefore possible to carry out a timely repair on the vehicle at the optimum cost.

The following information must be taken into account when classifying the two service compact bearings (RIU).

If there is no DAF part number present on the wheel hub, the bearing must be identified by the following dimensions:

FAG RIU 566074.H195

- External diameter of inner bearing (INBOARD) 125.000 mm
- External diameter of outer bearing (OUTBOARD) 125.000 mm

FAG RIU 566834.H195

- External diameter of inner bearing (INBOARD) 124.700 mm
- External diameter of outer bearing (OUTBOARD) 119.700 mm

Image 1: Service compact bearings (RIU)

If there is a DAF part number present on the wheel hub, proceed as follows:

- DAF part numbers 1691621 and 1699327: use FAG RIU 566074.H195
- DAF part numbers 1388905 and 1391615: use FAG RIU 566834.H195

If a DAF dealer specifies DAF part number 1697346 for your vehicle (repair kit including a new wheel hub), please note the following:

- Depending on the wheel hub installed on the vehicle, both FAG RIU 566074.H195 and FAG RIU 566834.H195 can be used
- Only the dimensions can be used to identify the correct FAG RIU

Appropriate spare parts can be found in our on-line catalogue at www.Schaeffler-Aftermarket.com or in RepXpert at www.RepXpert.com.
