

Complete solution for the Toyota Yaris!

febi 27262 rep. kit
Stabiliser drop-link to fit Toyota Yaris
from 1999 – 2005

The effects of weather and permanent high stress on the rubber mount lead to rapid failure of the stabiliser drop link.

The first signs of wear often become apparent because of a rattling noise.

The 12 components required in total are only supplied individually by manufacturers. It is difficult to handle the repair quickly because it is time-consuming to search for all the necessary components.

This is why febi has created a repair kit that conveniently combines all the parts required under one number. This saves time and ensures satisfied customers!

febi no. 27262

**The repair kit includes
the following individual
parts:**

- 1 x threaded rod**
- 5 x washers**
- 4 x rubber mounts**
- 2 x locking nuts**

Ask your febi partner for spare parts by febi bilstein! All spare parts can be found at www.febi.com.
