TECHNICAL REPORT

Selection of cylinder head
gasket in VAG engines of
1968 cc

PURPOSE

Inform our customers about the **distribution of notches** in cylinder head gaskets in VAG engines of 1968 cc for vehicles Volkswagen, Audi, Seat y Skoda.

DESCRIPTION

It may take to an error the selection of the thickness of the gasket of the cylinder head in VAG engines of 1968 cc, because there exist **two types of notches**:

➤ **Oval notches**

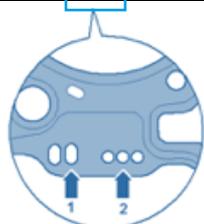

Indicate the production code of the gasket (can be ignored)

➤ **Circular notches**

Indicate the thickness of the gasket

The affected references are the following:

101852X0	101670X0
101682X0	101959X0

1. PRODUCTION CODE
2. N.º NOTCHES

In conclusion, the customer should not count the oval notches and should only consider the circular notches **to choose the correct thickness of the gasket.**
