Wishbone Fitting Kits

Replacement bolt kits for Land Rover Discovery & Range Rover Sport

We have recently added a selection of **Discovery and Range Rover Sport wishbone fitting kits** to our steering and suspension range. These bolt kits support our existing wishbone range for these popular Land Rover models, of which there are around **200,000 currently on the road**.

The **existing bolts often seize or corrode**, making it difficult to remove when a wishbone replacement is undertaken. **The bolts are usually destroyed or damaged on removal** so we recommend that they are always replaced with the wishbone.

There are considerable savings to be made with the FAI fitting kits over both OE and aftermarket competitors. **Please click below for more information on each kit.**
