

A guaranteed fit

Different design,
same quality

In order to comply with patent law, MAHLE has developed the LA 863/1 cabin filter, which only differs from the OE filter in appearance. In terms of quality, fit, and filter performance, it is 100% identical to the original part.

Better than the original

The MAHLE LA 863/1 cabin filter (OE no. A9608300718) for the Mercedes-Benz Actros MP4/MP5, Antos, and Arocs trucks offers the same quality, fit, and filter performance as the original spare part. And even better news: thanks to the optimized design, the MAHLE model uses less plastic, which makes the cabin filter more environmentally friendly and sustainable.

True alternatives

As one of the world's leading original equipment manufacturers and development partners of international manufacturers, MAHLE possesses the OE expertise to offer not only parts in OE quality but also products in OE matching quality that are true alternatives to original spare parts.
