As part of our continuous efforts to improve our products, the material of deflection pulley 532 0289 10 has been changed from metal to plastic. The pulley width of the new design is also 30 mm which is smaller than the metal design.

During the transition period, we may have mixed stocks of both types. Both versions fulfil the relevant technical specifications and can be used without restrictions.

This technical modification provides a reduction in weight and improved running characteristics.

Note the specifications of the vehicle manufacturer!

Appropriate spare parts can be found in our on-line catalogue at www.Schaeffler-Aftermarket.com or in RepXpert at www.RepXpert.com.
