QUALITY STATEMENT

STEERING & SUSPENSION

OE Specification.

BGA uses OE (original equipment) parameters and tolerances as the mandatory MINIMUM requirements to pass our quality controls – meaning that our components can and will often surpass OE.

3 Year Guarantee.

BGA offer a 3-year warranty on all products to back up the quality statement.

Mechanics endure full satisfaction and peace of mind while fitting BGA's high quality parts and components.

Safety Critical Components

Steering & Suspension parts and components play a vital role in keeping the vehicle safe on the road under all conditions. If something fails, the consequences can be fatal.

BGA take quality seriously, and will only release products to the production line once the part has proven to match Original Equipment quality standards through vigorous testing processes.

By fitting BGA, workshops understand they are receiving a part containing all components necessary for a complete install, with a quality guarantee.

SAFETY CRITICAL QUALITY

BGA Steering & Suspension parts are subjected to a 2,000 hour salt spray corrosion test - proven protection leading to a longer lifespan. OE test for 720 hours.

All welded components are tested electronically for welding penetration. Quality controlled products resulting in no returns of poor quality parts.

Track Control Arms are electronically coated (cataphoresis) for longer lasting corrosion protection. This significantly reduces salt, dirt and water ingress, increasing the product lifespan.

Round ended boot clips prevent boot penetration and premature failure.

Ball pins are roller burnished in production, including moly grease and OE quality nylon cup ensuring minimal friction and smoother actuation in the ball pin.

Ball Joints are lubricated with an industry leading grease (LN 584 LO), guaranteeing to perform at temperature from -40°C to +140°C.

Tough Neoprene boots ensure longevity and reduction in splitting.

All rubber bushing matches or exceeds the OE shore value tests.

OEM PARTS FAILING? BGA HAVE THE REPAIR SOLUTION.

Here's the UK's #1 vehicle for Steering & Suspension failures.

MAKE	MODEL	ENGINE	YEAR
FORD	FIESTA VI (CB1, CCN)	1-1.6L	2008-2017
FORD	FIESTA VI Van	1.25-1.6L	2009-2015
MAZDA	2 (DE_, DH_)	1.3-1.6L	2007-2015
FORD	KA+ III (UK, FK) FIGO	1.2-1.5L	2016-2018

BRAND NEW AIR COMPRESSOR

FITTING THE TESLA MODEL S.

The most common failure mode of the compressor is over heating due to a leak within the air suspension system resulting in the compressor running continuously in order to maintain the required pressure in the system. The most likely cause of an air leak is a worn bellow due to road debris trapped between the base plate of the bellow and the bellow itself causing chaffing of the bellow material. It is important to diagnose and rectify the original fault prior to installation of the new compressor.

BGA also supply the following Air Compressors:

SC4200

LAND ROVER
DISCOVERY IV (L319), RANGE ROVER
SPORT I (L320), DISCOVERY III (L319),
DISCOVERY IV VAN (L319)

SC4201

LAND ROVER
DISCOVERY IV (L319), RANGE ROVER
SPORT I (L320), DISCOVERY III (L319),
DISCOVERY III VAN (L319)

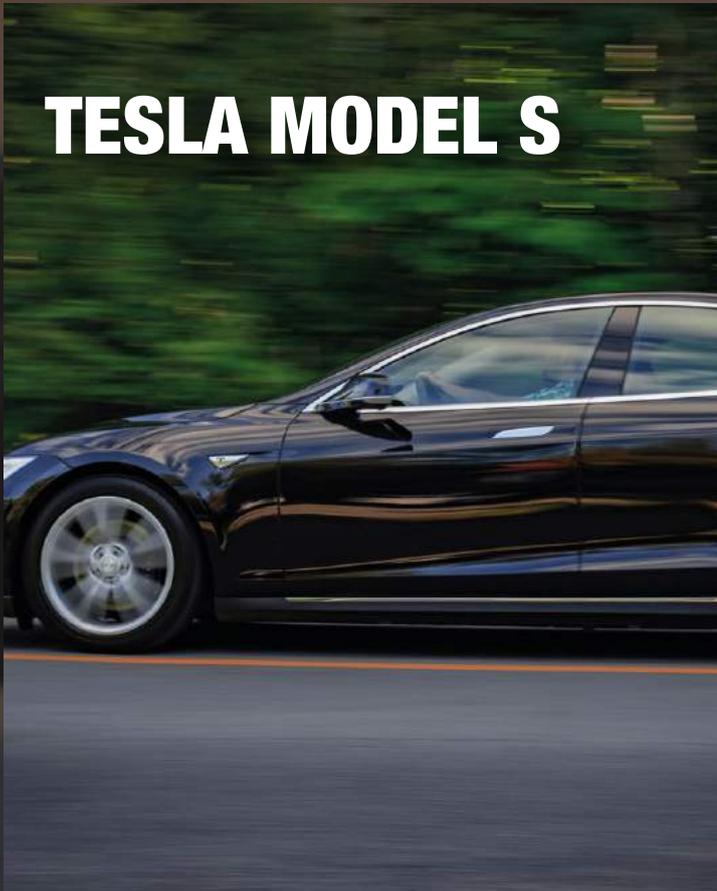

SC4202

LAND ROVER
RANGE ROVER IV (L405), RANGE ROVER
SPORT II (L494)
