

# NEXT-GENERATION TRANSMISSION OIL SUMP

Redefining automotive performance with advanced PA66+GF35 technology—delivering up to 60% weight reduction, seamless integration, and unmatched durability.

## Ultra-Lightweight & Highly Efficient

Crafted from high-strength PA66+GF35 composite materials, achieving a massive 40%–60% reduction in weight compared to traditional designs.

## Smart Integrated Design

Leverages the advanced formability of plastics to seamlessly integrate the oil pan with filters and other essential components.

## Superior Noise & Vibration Damping

Features high-damping polymer materials paired with an optimized reinforcing rib structure to absorb harsh impacts and vibrations.

## Unmatched Durability & Protection

Engineered from highly flexible, chemical-resistant polymers.
