CHARGE AIR COOLER

Plastic tanks: Reinforced with at least **30-35% fiberglass**.
No recycled plastics are used in the mixture

Compact fin construction with louvers increasing the heat exchange. (**10%** improvement in thermal efficiency)

Core end plates to minimize influence of the **mechanical stress** and breakdown.

Flat tube thickening
High-strength inner fins

Connections and mounting points are designed with a complete fit with the vehicle's layout

Side panels with cuts to lower the influence of **thermal expansion** on the core construction.
