SPARK PLUG

To Fit: CHEVROLET CRUZE J300 / CHEVROLET AVEO Hatchback T300
FIAT UNO 146, 158 / VOLKSWAGEN GOLF VI 5K1 / CHEVROLET TRAX

Superior Ignition
Performance

Extended
Service Life

Consistent Quality
& Reliability

Excellent Engine
Compatibility

Superior Ignition Performance

Stronger Spark: Advanced materials (Iridium, Platinum) and fine-wire electrode design allow for a more powerful, focused electrical spark.

Better Flame Kernel: This optimal spark creates a larger and more robust initial flame, leading to faster and more complete combustion of the air-fuel mixture.

Extended Service Life

Premium Materials: Iridium and Platinum have extremely high melting points and superior resistance to electrical erosion and chemical corrosion from fuel additives.

Reduced Wear: This results in much slower electrode gap growth, allowing the spark plug to perform effectively for tens of thousands of miles longer than conventional plugs.

Consistent Quality & Reliability

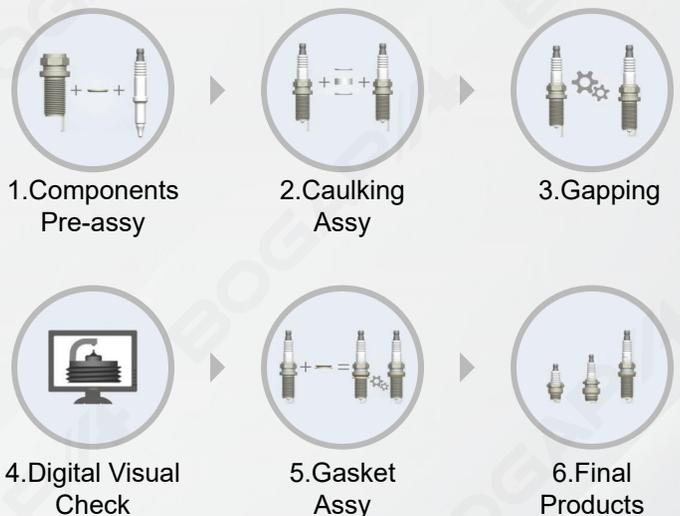

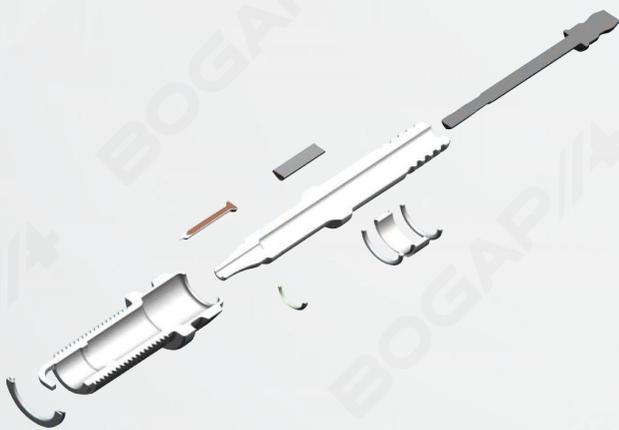

Precision Engineering: Manufactured to exact tolerances using global standards and automated processes, ensuring every spark plug has the correct gap, heat range, and dimensions.

Rigorous Testing: Products are tested to perform reliably under extreme heat, pressure, and vibration.

Excellent Engine Compatibility

Comprehensive Coverage: A wide range of product lines is available to fit virtually every vehicle on the road, from everyday commuter cars to high-performance turbocharged engines.
